

Lead Implementer ISO/IEC 27001:2022

Overview

ISO 27001 is a globally accepted framework for Information Security Management System (ISMS). ISO 27001 aids organizations of all sizes to secure their information systems cost-effectively. Applying ISO 27001 standard facilitates the organization's enhancing risk management capabilities for information security and increases systems and information reliability. Our ISO 27001 Lead Implementer course prepares the learners to handle everything regarding information security management system (ISMS) implementation in their organizations. This course also includes an exam that will help learners to validate their learning and become certified ISO 27001 implementers.

Our ISO 27001 Lead Implementer course covers the concepts of ISO 27001 Foundation Level, ISO 27001 Internal Auditor and all the concepts of ISO 27001 Lead Implementer itself. Learners will understand the evaluation of risks, risk assessment process, roles and responsibilities of lead implementer, etc. Learners will also gain skills for implementing ISMS, information security policies, Certification Process for individuals and organizations, among other concepts that will help the learners to succeed in the ISMS domain. Our ISO 27001 Lead Implementer course is designed by experts. This course will provide the learners with all the necessary knowledge of Information Security Management Systems (ITSM) to ensure compliance with business and regulatory obligations of the organizations. This ISO 27001 Lead Implementer training course will provide delegates with the ability to scale ISMS into an enterprise. You will learn how to boost information security in compliance with ISO 27001 standards. This ISO 27001 Lead Implementer training also covers concepts and topics from ISO 27001 Foundation and ISO 27001 Internal Auditor Training.
